

Postdoctoral Psychology Residency Program Tables
Date Program Tables updated: November 2018
Briefly describe in narrative form important information to assist potential applicants in assessing their likely fit with your program. This description must be consistent with the program's policies on intern selection and practicum and academic preparation requirements:
The goal of CHCI's Postdoctoral Psychology Residency program is to train the next generation of psychologists in the Patient Centered Medical Home model with locations across the state. Residents are given a stipend of \$50,000 and benefits include medical, dental and vision insurance, continuing education reimbursement and generous paid time-off. All residents will be expected to focus on outpatient clinical treatment in the primary care and behavioral health clinic settings with all age ranges. Specialized experiences, including shelter-based and school-based work, are available at most sites. Residents will fine-tune therapy skills through weekly seminars, group and individual supervision and clinical work with diverse, underserved populations.
Describe any other required minimum criteria used to screen applicants:
Applicants must have completed their doctoral training at an APA accredited graduate program. All requirements for the doctoral degree must be completed before starting the postdoctoral training program and these requirements will be verified by CHC staff.

Financial and Other Benefit Support for Upcoming Training Year*
